RE: Backflow Assembly Test Due at Current Occupant 44458 Lakeshore Dr Sterling Heights, MI 48313-1348

Dear Water Customer,

The State of Michigan requires that backflow prevention assemblies be installed on all hazardous cross-connections in an effort to keep our water supply safe. These assemblies must be tested and certified every year to ensure that they are working properly. The City of Sterling Heights has partnered with BSI Online to assist in administering the backflow program in your community. Our records show the following backflow assembly(s) at your property, which are due to be tested by December 1, 2025.

Size	Manufacturer	Model	Serial Number	Hazard	Location
1 1/2"	Febco	825	998568	Domestic	At Meter - In Closet In Office - Suite 140

You are responsible for hiring a licensed backflow tester to perform the annual test and certification of the backflow assembly(s) listed above (BSI does not test backflow assemblies). Please provide the CCN listed in the top right corner of this letter to your backflow tester, as they will need this number to properly file your backflow test reports via BSI Online. You may also use this CCN at www.bsionline.com to verify when your backflow test has been filed, locate a list of testers in your area, or to simply learn more about backflow. Please contact BSI via e-mail (support@backflow.com) or phone (888-966-6050) if you have any questions. Thank you for your cooperation and for helping to protect our water resources.

Sincerely,

Christine Walsh, Vice President
BSI / Agent for the City of Sterling Heights
